Zimbabwe							0 R	72			

**Notes:**

R = Russian military topographic map (shown in red)

N = US NGA (National Geospatial-Intelligence Agency) (formerly NIMA - National Imagery & Mapping Agency / DMA - Defense Mapping Agency) map (shown in blue)

All other sheets (no R or N, not shown in red or blue) are "in country" national maps or colonial maps

P = Partial Coverage (if there's no "P" in the "Available" column, then presume that the number of sheets listed gives full-country coverage)

Large-scale sheets have the actual scale confirmed in the comments field, contact us availability of additional large-scale "city graphics"

Russian-topos of the Americas are generally not listed, with the exception of countries where they'd complement the National map series (Bahamas, Cuba, Nicaragua & Peru)

If a country has multiple sources for the same scale it's listed twice, ie once for the National (in-country) series, once for the Russian series.

Due to copyright restrictions some maps are only available as original paper maps.

If the data you're looking for isn't listed contact us and we'll attempt to source it. 500k and 1:1M data also available.

Copyright 2004, LAND INFO Worldwide Mapping, LLC

**In addition to DRGs (Digital Raster Graphics -- color scans of topographic maps with geo-referencing), we also offer:**

Vector layers such as 3d contours, roads, railroads, bridges, airports / landing-strips, hydrology (lakes & rivers), coast lines, administrative boundaries, major pipelines & electric / telephone lines, settlements, mines, cemeteries, churches, schools & other important buildings

DEMs (Digital Elevation Models) from topo maps or ASTER stereo pairs. SRTM (Shuttle Radar Topography Mission) DEMs are now available for low-cost, large-area coverage.

QuickBird 60cm, Ikonos 1m, IRS 5m and Landsat 7 15m satellite imagery & processing services

Vector feature extraction from high-res imagery (roads, airports / landing-strips, hydrology, coast lines & building centroids / foot-prints)

Attributed transportation vectors for AVL (Automatic Vehicle Location, also referred to as vehicle tracking or fleet management)

Turn-key data for wireless communications (land-use clutter, DEMs & road vectors)

Aerial photography and 3d urban building models (limited availability)

USA data -- DRGs, DOQQs (Digital Orthos), DLGs (Digital Line Graphs), NED (best-available seamed & edge-matched 30m DEMs), custom 10m DEMs
